The Best Bag for Your 'Book (Part 3)

The Mac|Life Staff -- August 14 2007

For something more compact, check out the Sumdex NeoMetro Interchange II Slim Brief, a lightweight bag that's slim but surprisingly roomy. The big ding against this bag is its lack of a separate laptop compartment in the main pocket - there'd be plenty of room for a few magazines or file folders, but you risk scratching your laptop case unless you use a separate sleeve. This bag's zippers and fasteners glide nicely, and are made of very high-quality materials.
